

Bubble sort

Selection sort

Insertion sort

Linked list

How will you find loop inside linked list

Implement strstr using for loop.

Storage areas in C

malloc & calloc difference

access specifiers in C++

multithreading

when to use linked list over arraylist.

In which case you have to use linked list.

~~the~~ Entire compilation process of C

constructor & destructor invocation of base and sub class

when base class has virtual destructor &

Sub class has normal destructor then.

• which one will get called first.

# NSE - Tech. (Prasanna Sindhur)

- Pillars of OOPS with Example
- insertion sort
- AOP in spring
- DI in spring
- How you use Filters in spring
- Diff bet<sup>n</sup> Forward & SendRedirect in Servlets
- Diff bet<sup>n</sup> ArrayList & LinkedList
- How you Iterate over Map (write code)
- How you implement Threading
- Module developed by you works fine at your end but throws exceptions when deployed on server  
How will you try to resolve it or steps that you will follow
- Join queries, Triggers, procedure
- Clustered & Non-clustered Index
- Views (in Database)
