

# Object Edge Mumbai

Software Testing

Vijay Kshirsagar.

① Puzzles ①

Apple

orange

Apple + orange

find out

Correct one

mislabeled  
Jars

②

3 Persons

3 caps on head

2 Red 1 blue

find out

cap on head of C

When A & B says  
Nothing

③

3 Persons

5 caps

3 Red 2 Blue

find

out cap on head of C

When

A & B are quiet

④

Worker works for

7 days

& you have to

pay him wages

daily

Condition

you can cut bar only 2 times

Hint: you can exchange gold.

⑤

1 doctor

3 Patients

& 2 hand gloves

are available

Condition

one Patients blood should not mix with another blood  
& blood should not touch hands of doctor

⑥

2 Persons

have fruits

if A gives

1 fruit to B

then they have equal

no. of fruits

& if B gives

1 fruit

to A

then

A has double

than B.

## Software Testing

vijay kshirsagar

- ① What is manual testing?
- ② Write down test cases for an object (they give me AC Remo)
- ③ What do you know about Automation testing?
- ④ Can you write code in shell script, VB script which is required in Automation
- ⑤ Why do you choose testing?
- ⑥ explain. Software testing techniques.
- ⑦ Would you like to do S/W development if needed?
- ⑧ Some questions about educational Background.

OBJECT EDGEIntro Puzzles & Questions

1)

Equilateral Triangle

What is the probability that the three persons won't meet each other?

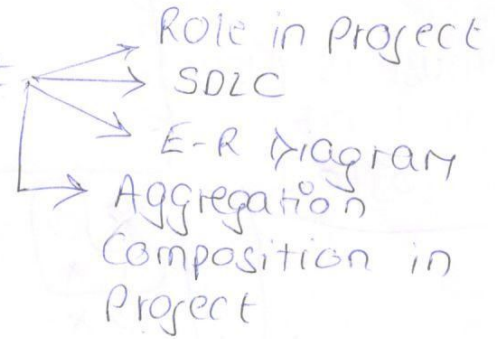

They all can move in any direction.

- 2) Explain CDAC Project
- 3) Project ER diagram
- 4) All questions about problem solving abilities.
  - How you solve prob. generally?
  - Your approach?
- 5) Role in Project.
- 6) 12 Database Rules [Hint: Codd]
- 7) OOPS Concepts (with ex.)
- 8) WRT Session
- 9) SQL Injection

17/Aug/2015 Object Edge

Santabh Taranpate

- 1] Puzzle asked. In Interview
- 2] Explain B+E project / CDAC Project
- 3] Collection.
  - Diff ArrayList & Array
  - Array & Collection
  - ArrayList & Vector
  - HashSet & HashMap
- 4] What is Hashing Function ?
- 5] Synchronization. ? Race-Condition.
- 6] Exception Handling ? Throw, Throws
- 7] Overriding / Overloading
- 8] Diff between procedure oriented, object oriented
- 9] Diff between structure & classes.
- 10] What is Deadlock, Criticle ~~Condition~~ section, Semaphore
- 11] String pooling Concept with program
- 12] Explain Code in Technical Round 1.
- 13] OOPS Principles
- 14] How are they Implement in your Project.
- 15] Equal And Hashcode Contract.
- 16] Servlet Execution Flow

You are Given  
This matrix

$\rightarrow \begin{bmatrix} 1 & 0 & 0 & 0 \\ 1 & 1 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 1 & 1 & 1 \end{bmatrix} \rightarrow n \times n \text{ matrix.}$

Mouse is positioned at  
 $\text{mat}[0][0]$

Mouse can go in  
Any direction

$\begin{bmatrix} \text{X} & 0 & 0 & 0 \\ 1 & \text{X} & 0 & 0 \\ 0 & \text{X} & 0 & 0 \\ 1 & \text{X} & \text{X} & \text{X} \end{bmatrix}$

"0" are Deadlocks  
"1" are Live Blocks

Accept deadlocks in a string format as follows.  
Str = (x,y:x,y: x,y - - - )  $\rightarrow$  ~~Acc~~

(\*) Find the path. for the mouse to reach the  
Last position i.e  $\text{mat}[n-1][n-1]$  without going  
over deadlock.

Assume

$\begin{bmatrix} \text{X} & 0 & 0 & 0 \\ 1 & \text{X} & 0 & 1 \\ 0 & \text{X} & 0 & 0 \\ 0 & \text{X} & \text{X} & \text{X} \end{bmatrix}$

ObjectiveFirst Round :-

Given a  $n \times n$  matrix where all numbers are distinct, find the maximum length path (starting from any cell) such that all cells along the path are in increasing order with a difference of 1.

We can move in 4 directions from a given cell  $(i, j)$  i.e. we can move to  $(i+1, j)$  or  $(i, j+1)$  or  $(i-1, j)$  or  $(i, j-1)$  with the condition that the adjacent cells have a difference of 1.

Second RoundPuzzles only

- ① Find defective weight in 8 cubes using 2 weighings.
- ② Using 3 ltr & 5 ltr bucket calculate 4 liter of water. ~~buckets having non.~~
- ③ 3 boxes are wrongly named as apple, orange and apple + orange, name them correct by only opening single box & checking a single fruit.
- ④ You have got someone working for u for seven days & gold bar to pay them. You must pay the worker for their work at the end of every day, if you are only allowed to make two breaks in gold bar, how do you pay your worker?  
(Assume equal amount of work is done during each day thus requiring equal amount of pay for each day)
- ⑤ 3 black caps & 2 white caps randomly 3 caps are chosen & A, B, C are made to wear they are standing in queue & A can see B & C, B can only see C & C can't see anyone.

A is asked which cap are u. wearing & Ans from A was he don't know B was asked which cap is he wearing & B answered I don't know. But when asked C. he gave answer

The question was ... which color cap was c wearing ?

⑥ Two shings which takes 60 min each to burn then calculate 45 min.

⑦ Surgeon 1 surgeon — 2 pair of gloves & 3 patients.

⑧ A takes 1 min to cross bridge

B → 2 min

C → 5 min → 1 torch.

D → 10 min. total time

calculate ~~min~~ minutes requires to cross bridge. by all four.
