

candy

cid	colour
k ₁	red
k ₂	white
k ₃	white
k ₂	red
k ₃	black

write a query to fetch cid whose colour is red and white

select cid from candy where colour = red and colour = white

This is wrong answer, i.e. you will get ~~id~~ correct ans by doing this

- ② write a program ~~to~~ by using threads
 one thread has to print 1 to 2 and
 one thread has to print 1 to 10

Company: Xtreme media

Interview Questions

(technical)

- 1) tell me about yourself?
- 2) write a class which will extends abstract class and implements interface
(basically he wants the diff. betⁿ abstract class interface & class with the help of example)
- 3) Write down the query which will fetch nth max. Salary. (If you explained it well then he might draw one table & ask you queries on that)
- 4) How will you write Singleton class.
- 5) How will you write immutable class.
- 6) difference betⁿ servlets & JSP.
- 7) draw MVC architecture & explain it.
- 8) overloading & overriding also
- 9) what is the diff. betⁿ HTML & HTML-5
types of CSS (inline, internal & external)
- 10) Dot net framework (CLR, CTS, CLS, WCF, LINQ etc)

group discussion

↳ always take opposite side

- a) Automated car
- b) cashless India

HR interview

1) tell me about your family background

→ she might ask you unexpected questions...

like i) tell me your father's quality that you want in you

ii) tell me your mother's quality that you don't like etc..

2) about your strengths & weakness

why do you think this is your weakness

3) why extreme media?

they wanted very good answer for this question.

4) Two puzzles (both are Nidhi mam's puzzle)

i)

apple

orange

apple +
orange
mixture

→ every box is mislabeled

ii)

you have 8 weights of same size, one is defective...

In how many iterations you will find defective weight?
