

L & T infotech Process

L & T infotech recruitment process :

1.>Aptitude Test(paper & pencil, not online)

3 sections, each had 20 questions, sectional cutoff(at my time it was approx 12-14 per section.), no negative marking, total time of 60 mins for the paper.

There will be 2 or 3 sets of question paper with different colours(for eg. Red,Yellow,Green). Questions in each of them are different.

Paper pattern:

Quantitative Ability:- 20 qstns.

Time & work.

Problem on ages(Simple ones).

Percentages.(Quite Simple lce, just read the questions properly)

Speed and Distance.

Pipes & Cisterns(Simple ones).

2 sure shot questions on matrices(Applied Mathematics).

Addition of two matrices.

Find the determinant of a matrix.

(If possible just revise the basics of matrix operations, that would do it, the problems are very easy... just we have to revise it).

3 questions on Data Interpretation.(very simple)

A graph is given may be a pie chart or bar diagram and questions based on that is asked. (Typically they ask us to find average sales or profit/loss in given time period based on the graph)

1 Or 2 questions on probability and permutation and combination.

Logical Ability:- 20 qstns.

3 Or 4 questions on Syllogism.(Practise it thoroughly, sure shot questions).

3 or 4 questions on Logical Arrangement.(For eg. If Ram is in front of Shyam and Shyam cannot be standing behind Rohit than where is Ram w.r.t Rohit. This is not an complete questn, it is jus an example, a big scenarion wud be given about who stands in wat position).

3 very simple questions on which Guessing which figure comes next in a given logical sequence of diagram.

(For example. the hands of watch, they wud turn anticlockwise or viceversa in the next sequential diagram).

There are some more questions(coz ritenow i can recollect tis much only of this section), u can ask Abhishek Kalekar for more of that.

Verbal Ability:- 20 qstns.

4 very simple and sure shot qstns on A given unseen paragrah to which we have to answr.

This question is typically placed at the end of the questn paper, but yu try to solve it 1st while attempting this section)

(Try to read the questions that follow the passage 1st and then read the passage and try to solve it, its quite simple, the level of english is moderate).

3 questions on Finding Synonyms.

2 questions on Finding grammatical mistake in a given sentence or group of

sentences.

2 questions on filling the blank with most appropriate word/phrase in a given sentence.

2.> Group Discussion(group of people between 5-10)

A topic would be given and a minute is given to put our thoughts on the paper. After that the supervisor will inform when to start n thn wen to stop.

Typically they pass on a sheet of paper where v have to enter our name and contact details, that sheet is for scoring record.

the sections it had on the paper was 1.Flucyency of language(normal indian english accent will work), 2.Participation in the group with the members, 3.Eye Contact, 4.how relevant you speak out.

The grp discussion wud go on about from 45 mins - 1 hr.

Even the manner in which you sit and getup is being noticed.

3.> Essay Writing(Not an eliminating round BUT if u write it extremely bad than it wud b the other way round)

Just understand the topic and write 7-8 relevant points on a given piece of paper. Normal english should work.

4.> Technical Interview (Typically around > 25mins)

(Make sure you fill the application form very accurately because they mostly ask questions based on that and then our resume is checked).

Questions asked to me:

Tel me somethng about yourself.(This answr has to be different than that u will answer for during HR interview).

What are views?

How would you rate urself on a scale of 1(1)-10(h) as a programmer?

Application of data structure in modern languages?

Tel me somethng abt final year degree project(As we had used linux questions were as follows).

What is cgi script?

How are devices represented in Linux?

Can you do ubuntu server installation and administration?

What is shell?

What are types of shell?

Then my resume was scanned.(and questions were as follows)

What is wcf?

asp.net framework

What is Hibernate?

What is the use and difference between Tomcat and Weblogic?

Tel me somethng about ur diploma final year project and Your contibution at that time.

Do you want to ask ne questions..(I asked is .net used more or Java in L & T)

Then interviewer ask do you know database query optimization

Then give me an example on that.

(there were some more questions but i could recollect this much only now)

5.> HR (typically >5mins)

L & T infotech Process

The supervisor who was there during the Group Discussion was the HR for my interview.

Questions are as follow:

Tell me something about ueslf.(This answr has to be different than that u answwed for during technical interview).

How was ur day?

How many companies u attended b4?

R u ready to relocate?

R u ready to sign 2 years bond?

Ne questions?

Then they give us a undertaking to sign on.

6.> HR2(Jus a formality, but dont take it lite)

How was ur day?

They told me about d details of abt the further letters and formalities to be completed.

This is what all I could remember as of now. I hope this above information could help u get placed soon. All the best.
