

## ITIVITI

Questions asked -abstract class & interface difference

2) can we use constructor in abstract class

3) can we create an object in abstract class

4)sql join

5) why did u join Cdac

6)local variable n instance variable

Garbage collector

SQL query

What is XML

How to create XML for your house

Git

Abstract class vs interface

Delete first node of Linkedlist

{{{{}}}} is string balance or not

How java is platform independent

{3,2,5,6,12} how to find addition of two numbers is 14

Linux commands

Scenario based question

Overloading overriding

Linkedlist basic explain

Linkedlist implementation

Query

join Types

1.Synchronizedlist vs list ?

2.Insert node in between

3.Some testing questions ..

4.{{{}}}} Is this string is balance or not???

5.Linux commands ...

6.sql query ...join ..

Max are application based....ds approach to solve problem

Static

Explain public static main

Do u know Xml ?

How java is platform oriented?

Jre jvm

Overloading Vs overriding

Abstract class Vs interface

Types of SQL joins,explain them

Linux basic commands

How is java platform independent

Situational based question about testing.

They gave me scenario in which he asked how will you approach this problem

a{3,2,5,6,12}

Addition of two numbers whose sum is 14 and other techniques of it.

What will be it's time complexity.

Time complexities

Linux and Unix commands

balanced string how u will check , count the occurrence of words in string , array sum problem in just  $O(n)$  , hashing based approach then randomly they will ask any linux cmd.

Abstraction vr interface

Linux basic command

Extension to save in java

Query on project project

scenario based questions where string balancing have to check, addition between two arrays logic along with time complexity, how to reduce time complexity, query from emp table where salary of all emp greater than emp 'mugdha', second query highest salary of 5emp from emp table, UNIX, LINUX commands
