

Book my show
Open Source (PHP)

① REST

② Return type of Date

③ echo & print difference

④ u can o/p

⑤ ~~base~~ basename() method returns?

⑥ what is method to find ~~difference~~ difference between
to Arrays? → Array_diff

⑦ Array_shift() - what does

⑧ Array_Pop → ^{on} O/P

⑨ Types of Array.

⑩ Index Array → Integer
Associative → String.

⑪ \$Require()

⑫ ~~\$sess~~ what is used for session store in PHP.

⑬ For Private Data what to use. ① GET ② POST

~~GET~~

BOOK MY SHOW

- 1) What is difference between Response.write() & Response.outputWrite()?
- 2) What is the Response.Object()?
- 3) Which language is used as Server side Scripting in ASP.NET?
- 4) What is the Specification of DoM?
- 5) Which interface is used for unique IDs?
- 6) Utilities used at Native Code?
Options \Rightarrow (a) Sn, (b) Sn, (c) Sn, (d) Dump bin.
- 7) What is the validator used for Pattern matching.
Options:- Regular Expression, (b) field validator (c) Pattern validator (d) _____
- 8) What is the extension of web service file.
 \Rightarrow (a) .px (b) .asmx (c) .R...px (d) - -
- 9) How you will explicitly end the user session.
a) Session.abandoned (b) session.end (c) ☒ (c) Session.close (d) _____?
- 10) How you will disable the Client Side validator.
a) Setting the ClientLevel to down level.
b) Setting the language to C#
c) Set runat at server
d) - -
- 11) Which specifier can be used so that true derived class can access base class.
a) Protected b) Private c) Private d) shared.

BookMyShow

- What can you put in the Global Assembly Cache
Ans) Shared Assembly
- ~~Ans)~~
- Preprocessor directives
- What is managed code?
- Web Service created with form validations, what if the customer gets hdd of the service.
- Difference between Server.Transfer & Response.Redirect
- .NET based on DCOM.
- Namespaces → ^{2 questions} XML to SQL
- Using statement
- For checking a pattern which Validator to be used?
- Garbage collection.

- 1) Which is the root class in .net hierarchy? Object
- 2)

```
CSharp abc;
```

```
abc = new CSharp();
```

→ abc reference to CSharp & object of CSharp is created on heap.
- 3) What is the dll file that is used to convert XML to dll?
- 4) Diffⁿ betⁿ `response.write()` & `Response.output.write()`?
- 5) Extension of webservice? .asmx
- 6) Which of the following is not preprocessor directive?
1) `#pragma` 2) `#or` 3) `#ifdef` 4) `#undef`

Bookmy show

- ① C# classes & object Related to creation,
② on heap.
- ③ shared assembly & private assembly
- ④ Asp.net state mgmt.
- ⑤ what is you ~~don't~~ want ^{to disable} client side validations.
- ⑥ Response.write() & Response.output.write(): diff?
- ⑦ Namespaces for xml to sql:-
- ⑧ preprocessor directives
- ⑨ garbage collector
- ⑩

Name: Preehana Hareendran.

BookMyShow

- 1) Why should I use database, if I can store data in notepad?
- 2) Write a program to find duplicate character in an array?
- 3) Explain the flow of your project.
